Professional Summary

Software Engineer with 6+ years of experience building scalable Java applications, microservices, distributed systems, and cloud-native platforms. Skilled in Java, Spring Boot, Kafka, Docker, Kubernetes, and AWS/GCP. Experienced in designing secure, fault-tolerant backend services, performance optimization, and CI/CD automation. Open to relocation.

Experience

Lead Software Engineer — UKG

Jan 2025 – Present

Pune, India

- Designed and delivered a Java-based deployment platform for multi-instance n8n services on Google Cloud Run, enabling fault-tolerant deployments through automated rollout, rollback, and health checks.
- Built CI/CD pipelines across 4 environments using GitHub Actions and centralized secrets using Google Secret Manager with least-privilege access controls and audit logging.
- Implemented observability dashboards tracking p95/p99 latency, error rates, and service saturation, improving production monitoring and reliability.
- Led schema design, indexing strategy, and performance testing initiatives using k6, Lighthouse, and Puppeteer to improve release confidence.

Software Engineer — HealthKart

Oct 2022 – Dec 2024

Gurgaon, India

- Built a centralized offer management platform supporting 5 consumer brands, improving consistency and reuse across business workflows.
- Developed Spring Boot microservices and REST APIs using Eureka and OpenFeign, enabling scalable service-to-service communication.
- Improved application performance using Redis caching, Elasticsearch search capabilities, Apache Spark processing, and Apache Druid analytics.

Senior Software Engineer — Mahindra Comviva

Dec 2019 – Oct 2022

Bangalore, India

- Developed Java and Spring Boot microservices for an enterprise loyalty management platform with secure third-party integrations.
- Managed Oracle schema evolution and production database migrations using Liquibase, improving deployment reliability and traceability.
- Delivered operational and business dashboards using Pentaho and Metabase to support reporting and decision-making.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, Microservices, REST APIs, Distributed Systems, OOP

Messaging: Kafka

Cloud: AWS, GCP, Cloud Run, Secret Manager

Containers: Docker, Kubernetes

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps/Monitoring: GitHub Actions, CI/CD, Grafana, Datadog, Splunk

Education

Certificate Programme in Applied Data Science & Artificial Intelligence

IIT Delhi

May 2025 – Nov 2025

B.Tech, Electronics & Communication Engineering

NIT Jalandhar

Aug 2015 – Jul 2019
