PROFESSIONAL SUMMARY

Full-stack software engineer with 6+ years delivering data-driven digital products across high-traffic e-commerce and SaaS platforms. Skilled in Java, TypeScript, Angular, and cloud-native backend systems — with a strong track record in performance engineering, analytics pipelines, and building scalable consumer-facing features. Experienced in fast-moving product teams with a start-up mindset, owning features end-to-end from idea to production. Comfortable working remotely across international teams. Open to relocation to Berlin.

WORK EXPERIENCE

Lead Software Engineer | UKG (Ultimate Kronos Group) | Jan 2025 – Present | Pune, India

- Built an Angular + TypeScript self-serve UI integrated with n8n workflow services and AI-powered automation (Claude Code, MCP Servers), reducing operational toil by over 50% and eliminating 40% of support requests.
- Designed and owned end-to-end deployment infrastructure on Google Cloud Run — GitHub Actions CI/CD, secrets management, health checks across 4 environments — cutting manual release steps by over 60%.
- Built Datadog observability dashboards (p95/p99 latency, error rate) with k6 CI performance gates, catching regressions in ~30% of pre-production runs and making every release fully data-backed.
- Led schema and ER design with Liquibase migrations and indexing strategies, improving database query performance by over 35%.

Software Engineer | Healthkart | Oct 2022 – Dec 2024 | Gurgaon, India

- Owned a centralised promotions and offer management platform serving 2M+ monthly active users across 5 consumer e-commerce brands — built once, scaled across the entire product portfolio.
- Improved API response times by ~40% through Redis caching and Elasticsearch-based search, directly improving user experience on high-traffic product and checkout pages.
- Built Apache Spark and Druid data pipelines powering real-time business analytics, personalisation, and performance reporting — enabling decisions 3x faster than previous batch processes.
- Designed Spring Boot microservices with Kafka event pipelines, Eureka service discovery, and OpenFeign for reliable, scalable inter-service communication.

Software Engineer | Mahindra Comviva | Dec 2019 – Oct 2022 | Bangalore, India

- Built full-stack features for a B2B SaaS loyalty platform in Java, Spring Boot, and JavaScript, supporting 10+ third-party integrations with fault-tolerant backend design.
- Delivered operational and business reporting dashboards (Metabase, Pentaho) used by ~50 internal users for platform activity and performance tracking.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL

Frontend & Web: Angular, React (familiar), HTML/CSS, n8n workflow automation

Backend & Frameworks: Spring Boot, Node.js, REST APIs, Microservices, Kafka, RabbitMQ

Data & Analytics: Apache Spark, Druid, Elasticsearch, Redis, PostgreSQL, MongoDB

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, GitHub Actions, Terraform, Helm

Performance & Observability: Datadog, Grafana, k6, Lighthouse, Playwright, Postman

AI & Automation: Claude Code, MCP Servers, n8n, GitHub Copilot

EDUCATION & CERTIFICATIONS

B.Tech in Electronics and Communication Engineering | NIT Jalandhar | 08/2015 – 07/2019

Certificate Programme in Applied Data Science and AI (In Progress) | IIT Delhi | 05/2025 – 11/2025
