PROFESSIONAL SUMMARY

Full-stack software engineer with 6+ years building and owning SaaS products end-to-end across global enterprise and high-traffic consumer platforms. Deep expertise in Java and Spring Boot, with hands-on delivery of Angular-based UIs, event-driven distributed systems, REST APIs, and cloud-native infrastructure on AWS and GCP. Data-driven by habit — I instrument and measure everything I ship. Comfortable taking features from zero to production in fast-moving product teams, working closely with product and design, and automating anything an engineer should not be doing manually. Open to relocation to Bangalore.

WORK EXPERIENCE

Lead Software Engineer | UKG (Ultimate Kronos Group) | Jan 2025 – Present | Pune, India

- Designed and built an Angular + TypeScript self-serve UI integrated with n8n workflow services on Google Cloud Run, enabling operations teams to configure and trigger automated workflows without engineering support — reducing support requests by over 40% and engineering toil by more than 50%.
- Owned end-to-end delivery of a Java-based multi-environment deployment platform (dev, stage, perf, prod) — covering architecture, schema design, GitHub Actions CI/CD pipelines, Google Secret Manager integration, and production health checks — cutting manual release steps by over 60%.
- Built Datadog observability dashboards tracking p95/p99 latency, error rate, and saturation; added k6 performance gates to CI, catching regressions in approximately 30% of pre-production runs and making every release fully data-backed.
- Led schema and ER design for core backend services, delivering Liquibase migration scripts and performance-oriented indexing strategies that improved query performance by over 35%.
- Centralised secrets across all environments in Google Secret Manager with least-privilege IAM, sanitisation guardrails, rate limiting, and audit-ready logging — significantly reducing unauthorised access surface.

Software Engineer | Healthkart | Oct 2022 – Dec 2024 | Gurgaon, India

- Owned and shipped a centralised offer and promotions service adopted across 5 consumer brands (Healthkart, MuscleBlaze, HKVitals, TrueBasics, Gritzo), serving more than 2 million monthly active users — eliminating duplicate logic across brands and becoming the foundation every team built on.
- Architected Spring Boot microservices with REST APIs, AOP-based custom annotations, Eureka service discovery, and OpenFeign client communication; improved API response times by approximately 40% through Redis caching and Elasticsearch-based querying for search-heavy product flows.
- Built large-scale data pipelines using Apache Spark and Apache Druid to power real-time business analytics and customer personalisation features — delivering insights approximately 3x faster than previous batch processes.
- Partnered closely with product and design teams for rapid iteration cycles across multiple brand platforms.

Software Engineer | Mahindra Comviva | Dec 2019 – Oct 2022 | Bangalore, India

- Built full-stack features for a B2B loyalty management SaaS platform using Java, Spring Boot microservices, and JavaScript — owning backend services and UI layers across more than 10 third-party integrations.
- Managed Oracle schema changes and production release migrations using Liquibase across more than 15 releases with zero rollback incidents; delivered operational dashboards in Metabase used by around 50 internal business users.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL

Frontend: Angular, React (familiar), HTML/CSS, n8n workflow automation

Backend & Frameworks: Spring Boot, Spring Security, Hibernate, Node.js, REST APIs, Microservices, AOP

Databases: PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch

Cloud & Infrastructure: AWS, GCP (Cloud Run), Docker, Kubernetes, Terraform, Helm, Vault

Messaging & Data: Kafka, RabbitMQ, SQS, Apache Spark, Apache Druid

Observability & Testing: Datadog, Grafana, Splunk, k6, Playwright, Postman

EDUCATION & CERTIFICATIONS

B.Tech in Electronics and Communication Engineering | NIT Jalandhar | 08/2015 – 07/2019

Certificate Programme in Applied Data Science and AI (In Progress) | IIT Delhi | 05/2025 – 11/2025
