

Davinderpal Singh

Senior Software Engineer | Java · Spring Boot · Payments & Transaction Systems
Pune, India | +91-9872968689 | gilldav1997@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with 6 years of experience building Java/Spring Boot microservices for high-volume transaction processing, payment gateway integrations, and cloud-native distributed systems. Hands-on expertise across the full Spring ecosystem (Boot 2 & 3, Spring Cloud, Spring Security 6, Data JPA), Kafka event-driven pipelines, OAuth2/JWT security, and multi-cloud infrastructure (GCP, AWS). Experienced in leading engineering teams, driving code quality, and leveraging AI tools — Claude, GitHub Copilot — daily to accelerate delivery and maintain high engineering standards.

PROFESSIONAL EXPERIENCE

Lead Software Engineer | UKG (Ultimate Kronos Group)

Jan 2024 – Present | Pune, India

- Architected and deployed Spring Boot 3 microservices on GCP Cloud Run with Kubernetes orchestration, Terraform IaC, Envoy proxy service mesh, and Cloud Load Balancer; designed API gateway patterns with rate limiting, circuit breakers, and retry logic supporting 10M+ monthly requests at sub-100ms p99 latency.
- Built Kafka event-driven pipelines with idempotent producers, consumer groups, and dead-letter queue handling for reliable asynchronous transaction processing; integrated Redis caching and Elasticsearch indexing to optimize read-heavy workflows.
- Leverage Claude and GitHub Copilot daily across the SDLC — AI-assisted code generation, automated test writing, root cause analysis, and documentation — increasing team throughput and maintaining high quality standards across a 3-engineer squad.
- Implemented GitHub Actions CI/CD with SonarQube quality gates, automated integration test suites (JUnit 5, Mockito), and performance regression checks — reducing deployment-related incidents by ~35% and enforcing consistent code quality.

Senior Software Engineer | Healthkart (Bright Lifecare Pvt. Ltd.)

Aug 2022 – Dec 2023 | Gurgaon, India

- Integrated 4 third-party payment gateways (initiation, callbacks, refunds, and reconciliation flows) with full idempotency guarantees and audit logging; built Kafka event-driven order processing pipelines (DLQ, retry, idempotent consumers) serving 5 brands and 2M+ MAU.
- Implemented Spring Security 6 + Keycloak for OAuth2/JWT-based AuthN/AuthZ across microservices; applied Redis caching on high-traffic endpoints improving p99 latency by ~55%, and deployed on AWS (S3, SQS, Lambda, CloudWatch).
- Led Spring Boot 2→3 migration including Spring Security 6 upgrade, JPA/Hibernate modernisation, and deprecated API cleanup; established Spring Cloud Eureka service discovery and OpenFeign inter-service communication across 8 microservices.

Software Engineer | Mahindra Comviva

Jun 2020 – Jul 2022 | Bangalore, India

- Built and maintained Spring Boot microservices for telecom payment gateway integrations processing 2M+ daily financial transactions across 3+ countries; implemented idempotency guarantees, exponential backoff retry logic, and API security via JWT + Keycloak (OAuth 2.0/OIDC) to meet financial services reliability and compliance requirements.
- Designed RabbitMQ dead-letter queues and retry handling for failed payment events; implemented zero-loss message processing patterns critical for financial transaction integrity.
- Optimised MySQL and Oracle RDBMS queries and JPA mappings on high-traffic payment endpoints, reducing p99 latency from ~800ms to <200ms; built JUnit 5/Mockito test suites and participated in structured code reviews, reducing regression defects by ~30%.

TECHNICAL SKILLS

Java & Spring: Java 8/11/17, Spring Boot 2 & 3, Spring Framework 6+, Spring Cloud (Gateway, Eureka, Config), Spring Security 6, Spring Data JPA, OpenFeign

Security & APIs: OAuth2, JWT, Keycloak (OIDC), Spring Security, RESTful APIs, API Gateway patterns, rate limiting, circuit breakers

Messaging & Streaming: Apache Kafka (idempotent producers, consumer groups, DLQ), RabbitMQ, Redis, Elasticsearch

Cloud & DevOps: GCP (Cloud Run, Load Balancer, Envoy, Secret Manager), AWS (EC2, S3, Lambda, SQS, CloudWatch), Docker, Kubernetes, Terraform, GitHub Actions, SonarQube

Databases: PostgreSQL, MySQL, Oracle RDBMS, MongoDB, Redis (caching & sessions)

AI & Developer Tools: Claude (daily), GitHub Copilot, Windsurf, AI-assisted SDLC, JUnit 5, Mockito, Maven, Gradle, Git, Jira

Practices: Microservices, TDD/BDD, Secure Coding, Code Reviews, Agile/SAFe, System Design, Performance Optimisation

EDUCATION

Certificate, Applied Data Science & AI | IIT Delhi, India

05/2025 – 11/2025

B.Tech, Electronics & Communication Engineering | NIT Jalandhar, India

08/2015 – 07/2019
